The MAILING DATE of this communication app Period for Reply	ears on the cover sheet with the c	orrespondence address			
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2611

DETAILED ACTION

- 1. It would be of great assistance to the Office if all incoming papers pertaining to a filed application carried the following items:
 - 1. Application number (checked for accuracy, including series code and serial no.).
 - 2. Group art unit number (copied from most recent Office communication).
 - 3. Filing date.
 - 4. Name of the examiner who prepared the most recent Office action.
 - 5. Title of invention.
 - 6. Confirmation number (See MPEP § 503).

Information Disclosure Statement

2. The examiner has considered the lds filed 3/17/05.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 4. Claims 1,2,7,10,11,19 are rejected under 35 U.S.C. 102(e) as being anticipated by Jeon et al (US2004/0109508).

Jeon discloses a system for wireless communication comprising: {See figs.1 and 2a, abstract, paragraph {0008,0013-0016} an equalizer tap calculation circuit for correcting the time constant and time varying channel effects (124); a phase tracking circuit (126,S201) for correcting the residual carrier frequency offset; a timing tracking

Application/Control Number: 10/661,147

Art Unit: 2611

circuit (126,S202) for correcting the sampling frequency offset; {detecting data received from the transmitter by using a first signal, and tracking a phase offset caused by the carrier frequency offset by using the detected received data; (b) detecting the data received from the transmitter by using the first signal, and tracking the phase offset caused by the sampling frequency offset by using the detected received data: (c) compensating for the phase offset caused by the carrier frequency offset between the transmitter and the receiver according to the phase offset tracked in (a); and (d) compensating for the phase offset caused by the sampling frequency offset between the transmitter and the receiver according to the phase offset tracked in (b): wherein the received signal complex signal is inputted from FFT (123) circuit: and the corrected complex signal is outputted to a soft decision demapper (125); wherein pilot signal are extracted for use in the phase and timing tracking circuit: wherein the complex signal comprises plurality of complex sub carriers (see paragraph 0016); wherein the phase tacking circuit is nested within the timing tracking circuit (see paragraph (0038,0040); the system further comprises sampling the received complex signal at an A/D converter (121).

Page 3

Allowable Subject Matter

5. Claims 3-6,8-9,12-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2611

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Temesghen Ghebretinsae whose telephone number is

571-272-3017. The examiner can normally be reached on Monday-Friday from 8 to 6.

The examiner can also be reached on alternate.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Jay Patel, can be reached on 571-272-2988. The fax phone number for the

organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
